

A woman with dark hair, wearing a bright red sweater and blue jeans, is sitting cross-legged on a light-colored cork floor. She is looking directly at the camera with a slight smile. The room has pink walls, a blue cabinet, and various framed pictures and plants. A large window is on the left side of the frame.

HARO[®]
Quality Flooring

Cork Floors

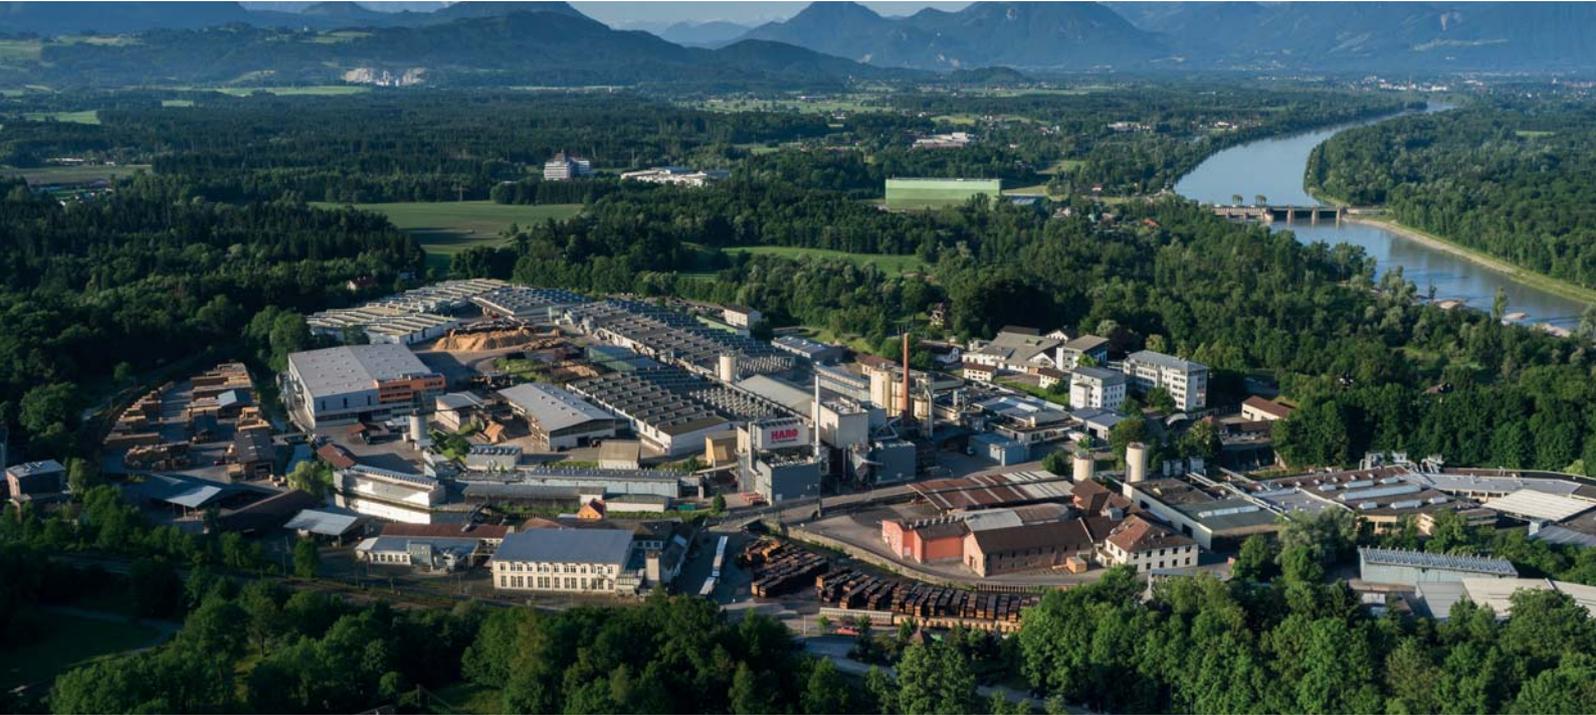

Welcome to HARO

Company management in
the fourth and fifth generations:
Peter Hamberger and
Dr. Peter M. Hamberger

As Germany's most successful parquet manufacturer, we have always strived to combine the highest level of living comfort with a natural healthy living environment. An integral part of this is the use of natural, certified raw materials and careful manufacturing processes. Since decades this has been making our parquet floors a success story. Our alternatives to real wood parquet, such as wood-based Laminate Floors, the DISANO Design Floors for healthy living and our Cork Floors, follow this principle. It is encouraging that more and more installers are interested in using the natural product cork as a floor covering. Cork is naturally soft and elastic, and radiates an incomparable warmth. In this catalogue, we present our interpretation of this unique raw material. You can choose between cork floors in a natural look and cork floors with digital prints that strongly resemble the original wood styles. Experience a newly interpreted natural look.

The Company

Our home for 150 years.

Consistent natural quality

At HARO we leave nothing to chance. This applies to our parquet floors as well as to the other floor coverings, which we are continuously developing through industry-defining innovations. Whether Laminate Floors, DISANO Design Floors or our trendy Cork Floors, the natural raw materials we use are the foundation for our healthy floors. Our products are manufactured without harmful substances, which is why we have been awarded numerous environmental certificates such as the Blue Angel. Thanks to our expertise in the professional processing of wood, we are also known as the manufacturer with particularly natural wood styles. Experience cork floors in a way you have never seen them before. and enjoy the pleasure of a natural floor covering in its aesthetic perfection.

Cork Floor in short

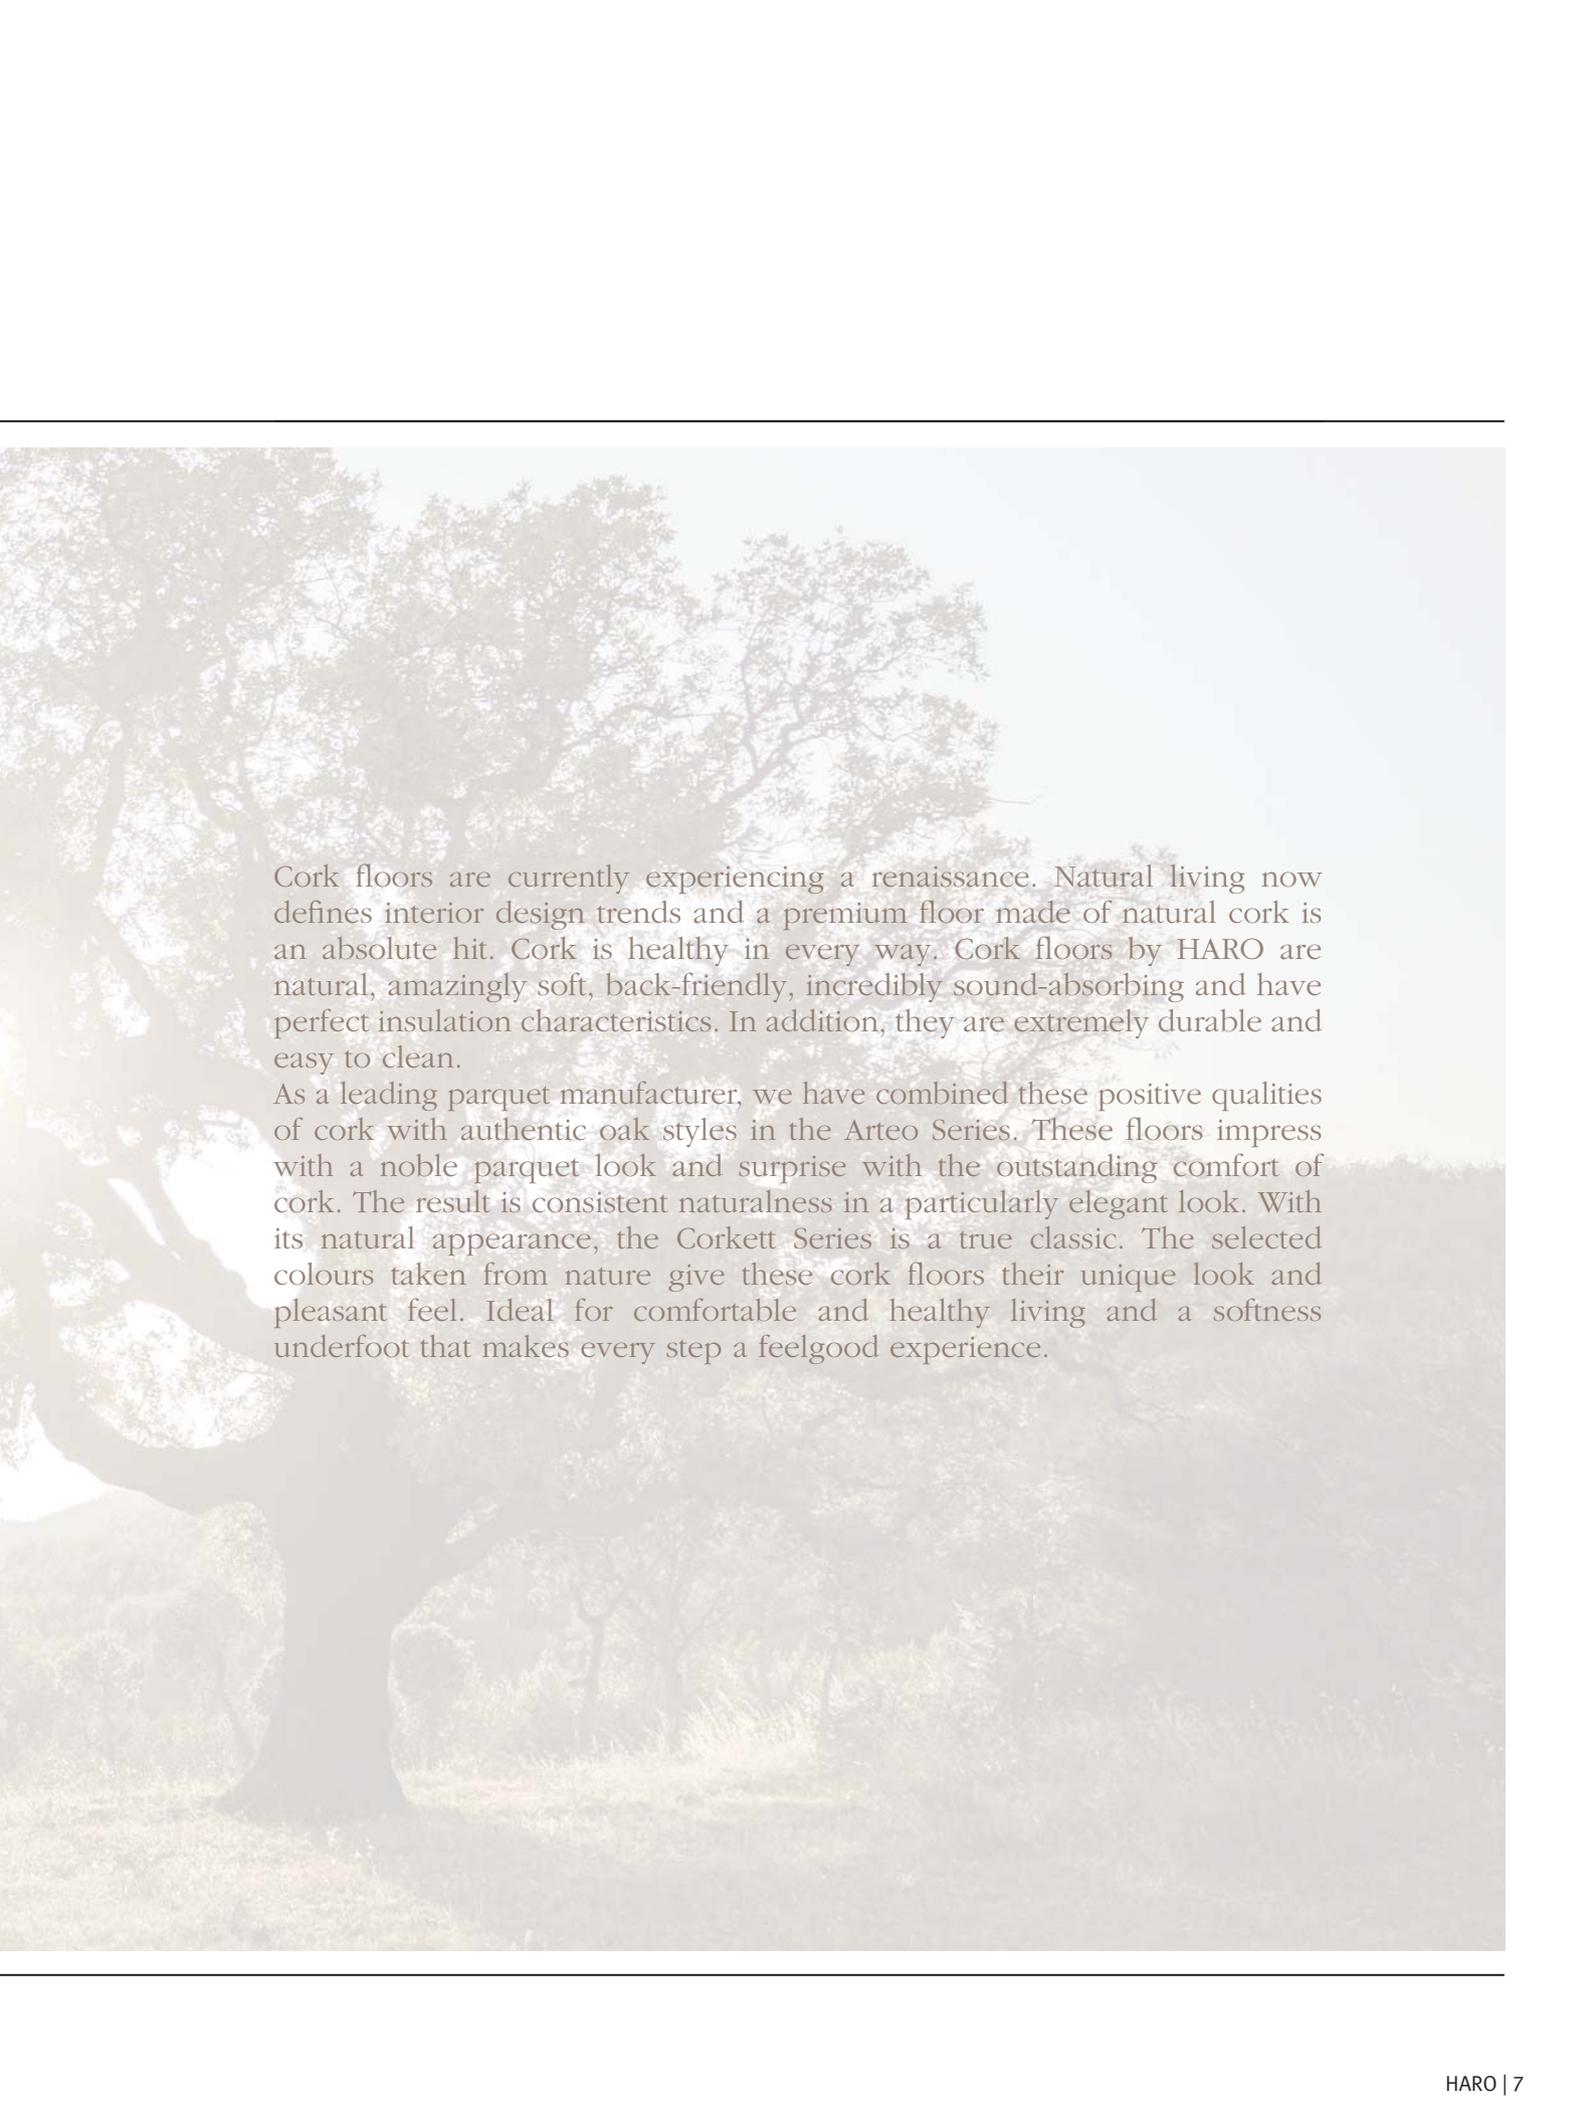

HARO Corkett Arteo XL 4V

The comeback of a natural classic in a modern outfit.
The look of oak parquet and the feel of cork.

HARO Corkett

Pure nature in look and feel for healthy and comfortable living.

Cork floors are currently experiencing a renaissance. Natural living now defines interior design trends and a premium floor made of natural cork is an absolute hit. Cork is healthy in every way. Cork floors by HARO are natural, amazingly soft, back-friendly, incredibly sound-absorbing and have perfect insulation characteristics. In addition, they are extremely durable and easy to clean.

As a leading parquet manufacturer, we have combined these positive qualities of cork with authentic oak styles in the Arteo Series. These floors impress with a noble parquet look and surprise with the outstanding comfort of cork. The result is consistent naturalness in a particularly elegant look. With its natural appearance, the Corkett Series is a true classic. The selected colours taken from nature give these cork floors their unique look and pleasant feel. Ideal for comfortable and healthy living and a softness underfoot that makes every step a feelgood experience.

Cork Floor in short

HARO Corkett Arteo XL 4V

Natural cork flooring in what is most likely its trendiest form: The Plank 1-Strip format and the bevelled edges on four sides make the Arteo XL 4V Cork Floor a stylish star of interior design. It is available in 10 authentic wood styles.

Board dimensions:
195 x 1235 mm

HARO Corkett

Even a real classic can be enhanced. In a particularly wide format and with five authentic cork look variants, the HARO Corkett range surprises with its captivating naturalness.

Board dimensions:
298 x 907 mm

Installation

PROBABLY THE
WORLD'S EASIEST
INSTALLATION SYSTEM:
HARO TOP CONNECT.

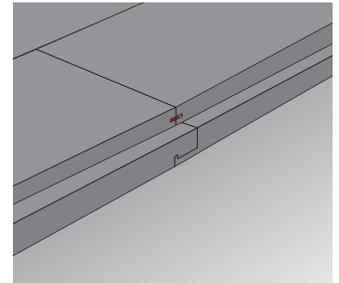

Angle in

For all those who want to install their cork floor themselves but have never dared to, we have developed Top Connect. With probably the world's easiest installation system, the most

Press down

beautiful floor designs can be created very simply and with an extraordinary stability. Without any tools. The boards are angled in at the long sides and interlocked at the short sides with a small

Done

amount of pressure. The floor fits perfectly and is ready to be "lived on" immediately. It is just as easy to deinstall if you move house.

UNDERFLOOR HEATING

Our Corkett Cork Floors are not only suitable for installation on underfloor heating - they are ideal for it! This is because the technical structure of our floors ensures that warmth can easily get through and is stored very well. This way, you can save heating costs and enjoy a pleasantly regulated underfoot warmth during the heating period.

Care

NATURAL CARE FOR NATURAL FLOORS

HARO Cork Floors are easy to clean. For modern, environmentally conscious households, we have developed ecologically harmless cleaning and care products that are particularly easy to use. For natural floors such as our HARO Cork Floor, we recommend clean & green natural parquet cleaner for regular cleaning and care. For basic cleaning or to remove ingrained dirt, clean & green Intensive Cleaner active should be used. To refurbish the floor visually, increase its durability and as a better protection against moisture of varnished and coated surfaces, we recommend the clean & green aqua shield floor care product. With the clean & green products you can clean and maintain all of our floors.

clean & green®
Quick, easy and natural maintenance of all floors

Accessories

SKIRTINGS - WITH SYSTEM

For each of our cork floors we offer matching skirtings for a perfect overall appearance. To make it especially easy to realise your personal dream floor, we have developed an attractive, yet brilliantly simple skirting system.

MOULDINGS - STYLISH TRANSITIONS FROM DISTINCTIVE TO SUBTLE

When installing different floors, a matching transition is an important factor, both visually and haptically. For this purpose, we offer transition mouldings in various colour designs. You can either set striking accents or create subtle transitions. Our transition mouldings can also achieve a skilful transition when the floors slightly differ in height.

Certifications

ISO 9001

Our quality management system has been certified in accordance with DIN EN ISO 9001:2000 since 1995. It secures workflows in the company and consequently contributes to maintaining a consistent product quality.

ISO 14001

With the certification according to DIN EN ISO 14001:2004, we have committed ourselves to active environmental management since 1998.

HARO WARRANTY

In addition to the statutory warranty terms, HARO also provides additional warranties for various product groups. Please note the respective warranty conditions.

www.blauer-engel.de/uz176

BLUE ANGEL ECO LABEL

The Blue Angel has certified the environmental compatibility of our products since 1992.

MADE IN GERMANY

Because our top quality floors are of the proverbial German high-precision workmanship, they come with the internationally renowned "Made in Germany" label.

Product variety from HARO

In its diversity, wood is a fascinating material. We stand by our passion for wood and use its natural appeal, powerful ambience and diverse properties as the basis for stylish living with our products for the home.

HARO PARQUET

Our Parquet Floors are made exclusively of the highest quality wood. With a HARO Parquet, you can lastingly enhance your rooms and enjoy the highest level of living comfort for many years to come.

HARO LAMINATE FLOOR

Laminate floors are made of up to 90 percent wood. This means that the positive properties of real wood floors are combined with the technical benefits of artificially produced surfaces.

DISANO by HARO –

The design floor for healthy living
DISANO is not only the perfect solution for modern and vibrant living. DISANO also creates a 100% healthy living environment and is produced without the use of any plasticisers or other environmentally hazardous substances.

PARKETTMANUFAKTUR by HARO

What emerges here from masterful craftsmanship are floors that are unsurpassed when it comes to noblesse and uniqueness. With real workmanship, the most precious woods are processed into top class parquet floors.

CELENIO by HARO – The unique wood floor

Our passion for wood combined with our eagerness to find extraordinary solutions have led to the unique innovation CELENIO: the combination of the optics of stone with the warmth of wood.

INTERIOR

With HARO Interior you can also use the natural charisma of precious wood for wall design and panelling on the sides of the stairs. As a perfect eye-catcher, you will also find the "HARO Table" here.
